

H2O Vac Turbo Water Filtration System Vacuum Cleaner

Suction Control

Retractable Cord

Speed Control

HEPA Filter

Strainer for water tank

Water Filtration System

ALL IN ONE

DRY VAC

WET VAC

AIR PURIFYING

WATER FILTRATION

FIRST TIME IN INDIA THE ONLY VACCUM CLEANER TO UTILIZE AQUA-FORCE TECHNOLOGY

The H2O Vac Turbo is build to last a lifetime yet it's lightweight enough to maneuver anywhere. With adjustable suction levels now you can clean in and around even the most delicate items.

- No clogging and dusty dirty bags to bog suction down
- In addition to air purifying, it cleans messes on all surfaces and delicate materials
- Environmentally friendly and easy to use + empty
- Use the included set of air nozzles to inflate air mattresses, balls and pool toys
- Powered by 1200 Watt and air flow suction of 60 CFM

WATER FILTRATION

Unlike all other vacuums, the H2O Vac Turbo sucks all the dirt and dust into its "sealed" aqua chamber... literally trapping it under water, so there are no flying dust particles.

AQUA-FORCE TECHNOLOGY

Water Filtration

CLEANS MESSES INSTANTLY!

- Unlike all other vacuums the H2O Vac Turbo sucks all the dirt and dust into its sealed aqua chamber literally trapping it under water.
- Combined with its certified Hepa filter, traps 99.97% of all the unwanted dirt, dust and harmful allergens that other vacuums can spew back into the air.

When it comes to vacuuming small or awkward areas quickly and conveniently, there's nothing quite like a hand held vacuum. A cordless hand held vacuum cleaner knows no boundaries and with an endless list of uses.

If you're wondering if you'd use a hand held vacuum, here's a list of uses for a hand held vacuum cleaner:

1) Cleaning up mess from the children

Usually, where there are children, there is mess to be cleaned up. From glitter to bread crumbs, a hand held vacuum cleaner can be on standby so you can clean up mess in an instant and without the hassle of bringing out the vacuum cleaner.

2) Small spills

Getting the vacuum cleaner out for a small spill or area can feel like more effort than what it's worth. It's much easier and quicker to whip out a hand held vacuum cleaner. So whether you want to pick up pine needles from the Christmas tree or sand that has been carried into the house after a trip down the beach, a hand held vacuum cleaner can always be on hand.

3) Small/awkward spaces

Most vacuum cleaners come with onboard tools but when you're reaching into small or awkward spaces the hose can make vacuuming cumbersome and restrict your freedom. With a hand held vacuum cleaner you have fantastic freedom and maneuverability so whether you want to clean shelves, cupboards or around furniture, you'll find vacuuming so much easier.
