

Steel Users Federation of India

A COMMON AND UNITED PLATFORM

Welcome to SUFI

India is the world's third-largest producer of crude steel (up from eighth in 2003) and is expected to become the second-largest producer this year. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.
